DETAILED ACTION

Claims 34-39, and 46-94 are pending.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- a) isolated nucleic acids encoding amino acid residues 1-417 of SEQ ID NO:6
- b) isolated nucleic acids encoding amino acid residues 25-417 of SEQ ID NO:6
- c) isolated nucleic acids encoding amino acid residues 25-198 of SEQ ID NO:6
- d) isolated nucleic acids encoding amino acid residues 338-417 of SEQ ID NO:6
- e) isolated nucleic acids encoding amino acid residues 19-204 of SEQ ID NO:6
- f) isolated nucleic acids encoding amino acid residues 339-409 of SEQ ID NO:6

The products of the above species represent more than a reasonable number of species as set forth by 37 CFR 1.146. Furthermore, the above sequences represent separate and distinct molecules with different structures and functions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 34, 46, and 70 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary B. Nickol Ph.D. whose telephone number is 703-305-7143. The examiner can normally be reached on M-F, 8:30-5:00 P.M..
